REST API SPECIFICATION & INTEGRATION GUIDE (MODULE M5)

Target Platform:	JRN Platform (Direct API Ingestion)
Agreement Scope:	**M5: Infrastructure / API Access (INCLUDED & ACTIVE)**
Base Gateway URL:	https://api.ottmconnect.com/api/v1
Production API Key:	**jrn_live_key_9f82a17cb4e82026**

We formally confirm that Module M5 — Infrastructure / API Access is officially included and selected in your agreement. JRN Platform is NOT restricted to the white-label portal and has full programmatic access to execute distribution workflows, asset ingestion, and royalty synchronization directly from your existing platform.

```
X-API-Key: jrn_live_key_9f82a17cb4e82026
```

3. Core Distribution Workflow Endpoints (M5)

POST `/distribution/upload`

High-speed multipart upload for lossless audio masters (WAV/FLAC up to 150MB) and high-res artwork (min 3000x3000px).

POST `/distribution/releases`

Programmatically dispatch singles/albums into global distribution. Automatically generates UPC/ISRC codes and queues delivery to Spotify, Apple, YouTube, JioSaavn, Wynk, and Amazon Music.

GET `/distribution/releases`

List all submitted releases with live store delivery statuses.

GET `/distribution/releases/:id`

Retrieve track-level ingestion progress and verified DSP streaming links.

POST `/distribution/releases/:id/takedown`

Submit an automated takedown request across partner DSPs.

4. Revenue, Analytics & Payouts Endpoints

GET `/revenue/summary?period=all`

Returns consolidated stream volumes, gross/net splits, DSP breakdown, and geo analytics.

GET `/revenue/periods`

List of all finalized statement months.

GET `/payouts`

Query payment history, invoices, status, and bank transaction reference numbers.

5. Integration Deliverables & Postman Support

- Interactive Online Documentation: https://api.ottmconnect.com/api/v1/docs
- OpenAPI 3.0 JSON Specification: https://api.ottmconnect.com/api/v1/openapi.json
- Postman Collection: JRN_OTTM_API_Postman_Collection.json (enclosed for 1-click import)
